Define Problem Statements (Customer Problem Statement Template):

As a cricket fan and analyst, I am trying to track player and match performance in a single, consolidated platform. But the current systems are scattered across multiple sources and require manual effort to gather statistics. Because of this lack of integration, I spend too much time compiling data instead of analyzing it. This makes me feel frustrated with the inefficiency, yet hopeful that a unified solution like CRICKSTATS can provide accurate, automated dashboards and help me focus on meaningful insights.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A cricket fan and analyst	Track player and match performance	Current systems are scattered and lack integration	Need consolidated dashboards and automated stats	Frustrated but hopeful for a unified solution
