

Solution Architecture

Date	29 September 2025
Team ID	SWTID-2026-8821
Project Name	CRICKSTATS - Cricket Player Performance Tracking Application
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	User-facing interface where coaches, managers, analysts and admins log in, register players, enter match statistics, and view reports and dashboards. Provides easy navigation between objects and records.	Salesforce Lightning Experience, Lightning App, Record Pages, Home Page
API Gateway	Single secure entry point for all user requests. Handles HTTPS access, session/login validation and routing to platform services, and scales automatically under load.	Salesforce Lightning Platform, Salesforce APIs (multi-tenant cloud)
Microservices	Application logic: authentication and role-based access, flow automation of routine data tasks, report generation, dashboard visualization, and player ranking and comparison.	Salesforce Profiles, Roles & Permission Sets, Salesforce Flows, Reports & Dashboards
Database	Centralized, structured storage of player records and match-by-match performance data with relationships, giving reliable history, backups and fast retrieval.	Salesforce Cloud Database, Custom Objects (Player, Match Performance)
