

Coding & Solution

Date	29 September 2026
Team ID	SWTID-2026-8821
Project Name	CRICKSTATS – Cricket Player Performance Tracking Application
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/nadiatasneems/CPPTA/commits?author=nadiatasneems
Programming Language(s)	Salesforce / Apex configuration, Salesforce Flow
Framework(s) Used	Salesforce Lightning Experience
Key Features Implemented	Cricket Player Management, Match Statistics, Custom Objects, Fields & Relationships, Roll-Up Summary, Validation Rules, Screen Flow, Reports and Dashboards
Pending / Incomplete Features	No major pending feature mentioned in the project report
Setup / Run Instructions	Login to Salesforce Developer Org → Open CRICKSTATS App → Use Cricket Players and Match Statistics tabs → Enter performance data → View Reports/Dashboards → Use Player Flow

No major pending feature mentioned in the project report

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	To be updated

Additional Notes / Comments:

CRICKSTATS provides a structured Salesforce-based solution for managing cricket player and match performance data. Custom objects, relationships, roll-up summary fields, flows, reports and dashboards are used to organize and analyze performance information.
