|----------------------|--------------------------------------------------------------|
| <b>Date</b>          | 29 September 2026                                            |
| <b>Team ID</b>       | SWTID-2026-8821                                              |
| <b>Project Name</b>  | CRICKSTATS – Cricket Player Performance Tracking Application |
| <b>Maximum Marks</b> | 5 Marks                                                      |

### Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

| S.No | Feature Name                        | Feature Description                                                    | Module / Component                      | Status (Done / In Progress / Pending) | Marks Contribution |
|------|-------------------------------------|------------------------------------------------------------------------|-----------------------------------------|---------------------------------------|--------------------|
| 1    | Player Registration & Management    | Stores and manages cricket player information                          | Cricket Player Object                   | Done                                  | 1                  |
| 2    | Match Statistics Entry              | Records match-wise player performance                                  | Match Statistics Object                 | Done                                  | 1                  |
| 3    | Performance Tracking                | Tracks runs, wickets, matches, catches and other statistics.           | Fields & Roll-Up Summary                | Done                                  | 1                  |
| 4    | Player Ranking & Comparison         | Helps compare player performance and statistics.                       | Reports & Analytics                     | Done                                  | 1                  |
| 5    | Flow Automation                     | Allows users to select a team and view player information dynamically. | Salesforce Screen Flow                  | Done                                  | 1                  |
| 6    | Reports                             | Generates performance reports from stored data.                        | Salesforce Reports                      | Done                                  | 1                  |
| 7    | Dashboards                          | Displays performance information visually.                             | Salesforce Dashboards                   | Done                                  | 1                  |
| 8    | Validation & Secure Data Management | Prevents incorrect data entry and supports controlled access.          | vValidation Rules / Salesforce Security | Done                                  | 1                  |

### Feature Summary:

| Metric                     | Count / Value |
|----------------------------|---------------|
| Total Features Planned     | 8             |
| Total Features Implemented | 8             |
| Core / Must-Have Features  | 8             |

|                                    |   |
|------------------------------------|---|
| Additional / Nice-to-Have Features | 0 |
| Features Tested & Verified         | 8 |

**Feature Category Breakdown:**

| S.No | Category                  | Features in Category | Example Features                         |
|------|---------------------------|----------------------|------------------------------------------|
| 1    | User Interface (UI)       | 2                    | Lightning App, Navigation Tabs           |
| 2    | Backend / Logic           | 2                    | Flows, Validation Rules                  |
| 3    | Database / Storage        | 2                    | Cricket Player, Match Statistics         |
| 4    | API / Integration         | 0                    | Not specified in the project             |
| 5    | Security / Authentication | 2                    | Secure Authentication, Role-Based Access |
