

Performance Testing

Date	29 September 2026
Team ID	SWTID-2026-8821
Project Name	CRICKSTATS – Cricket Player Performance Tracking Application
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Salesforce Lightning Experience / Manual Testing
Type of Testing	Load Testing / Performance Testing
Target Module / API	CRICKSTATS Lightning App, Player Flow, Reports & Dashboard
Test Environment	Salesforce Cloud / Developer Org
Test Date	27 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Open CRICKSTATS application	5	60	Application loads successfully
2	Access Cricket Player records	5	60	Player records load correctly
3	Run Player Flow and display player information	5	60	Flow responds correctly
4	Open Reports and Dashboards	5	60	Reports and dashboards load successfully

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Not measured	—	Tool measurement required
2	Response Time (Max)	< 5 seconds	Not measured	—	Tool measurement required
3	Throughput (Req/sec)		Not measured	—	Tool measurement required
4	Error Rate	< 1%	Not measured	—	Tool measurement required
5	CPU Utilization	< 80%	Not measured	—	Tool measurement required
6	Memory Utilization	< 80%	Not measured	—	Tool measurement required

Step 4: Observations & Analysis

The CRICKSTATS application is designed to provide quick access to player information, performance statistics, reports and dashboards. The system uses Salesforce cloud infrastructure and automation features for managing and analysing performance data.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):
