

Project Executable Files

Date	29 September 2026
Team ID	SWTID-2026-8821
Project Name	CRICKSTATS
Maximum Marks	3 Marks

Project Executable Files

This section contains all executable and deployable files required to run the **CRICKSTATS** application. The files are organized and named systematically to ensure smooth evaluation. With the provided source code, documentation, and setup instructions, the evaluator can directly access the Salesforce org, deploy the solution, and verify its functionality — including custom objects, flows, roll-up summaries, and dashboards.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package. Son / dependency file	NA (Salesforce project)
4	Database schema / seed files (if applicable)	NA (Salesforce Objects used)
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL	Yes (Salesforce Org URL)
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes (Flow test cases, dashboard validation)
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

The file and Folder structure is provided here.

[Paste or describe your folder structure here. Example:]

```

/project-root
/src    - Source code files
/tests  - Test files
/docs   - Documentation
/config - Configuration files
README.md - Setup and run instructions
requirements.txt - Python dependencies (or package.json for Node)
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Salesforce Org → https://login.salesforce.com
Login Credentials (Demo)	Username: snadiatasneem.a7ed1e0a88ce@agentforce.com password: nadia@dia2006
Platform / Hosting Provider	Salesforce Cloud
Repository Link	GitHub → https://github.com/nadiatasneems/CPPTA
Demo Video Link	Demo → https://drive.google.com/file/d/1GcI_VluJMJaHD0ELgGMYCpMEsD8n1NRh/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

- Salesforce Developer Org access
- System Administrator profile

Steps:

1. Log in to Salesforce Org.
2. Navigate to **App Launcher** → **CRICKSTATS**.
3. Ensure Player and Match Performance objects contain sample records.
4. Open **Players Flow** from the Home page.
5. Select a team from the picklist → Click Next.
6. View player details, aggregated stats, and dashboards.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Flow response slows with very large datasets (>50,000 records).	Offline access not available (requires Salesforce login).
2	Dashboards require manual refresh for updated roll-up summaries.	Schedule dashboard refresh.
3	Offline access not available (requires Salesforce login).	NA — inherent to Salesforce Cloud.
