

Scalability & Future Plan

Date	29 September 2026
Team ID	SWTID-2026-8821
Project Name	CRICKSTATS
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current CRICKSTATS solution can be scaled to handle larger user bases, increased data loads, and extended features in the future. It also captures the roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited to single league/team dataset	Restricts broader adoption across multiple leagues	High
2	Manual data entry for match statistics	Increases workload and risk of human error	Medium
3	No offline access	Users cannot view dashboards without Salesforce login	Low

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports small groups of evaluators and team members	Expand to handle thousands of concurrent users via Salesforce Enterprise scaling
2	Data Storage	Stores limited player and match records	Integrate with Salesforce Big Objects or external data warehouse for large datasets
3	Performance	Roll-up summaries and flows optimized for moderate datasets	Implement batch processing and scheduled jobs for high-volume data

4	Security	Role-based access with Salesforce authentication	Add multi-factor authentication, audit logs, and advanced encryption for enterprise use
---	----------	--	---

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	Mobile application integration	Q3 2026	Enables on-the-go access for coaches and fans
Phase 3	AI-based performance prediction	Q4 2026	Provides predictive insights into player form and match outcomes
Phase 4	Video analysis integration	Q1 2027	Links match footage with statistics for deeper tactical insights
